

Now Available: UPDATED Secure Seal, Secure Seal Adaptor, and Secure Stack Catalogs

November 21, 2013

We have released updated versions of their Secure Seal SS/SSD/SSID, Secure Seal Adaptor, and Secure Stack CIX/CAX catalogs (web versions only). The updated catalogs can be found on the company website www.securitychimneys.com. These catalogs can be located within each appropriate product page within the downloads tab.

Each product line maintains its own separate catalog file. Each catalog is formatted for easy product look-up, sectioned by headers for each component type (e.g. "Lengths", "Tees", "Elbows", etc). Incorporated product pictures and illustrations allow for ease of product reference, and brief descriptions and tables offer appropriate dimensions and product codes. Product ordering details and warranty information are also available within each catalog.
